Aimtec offers a wide range of package types

The Aimtec brand is associated with quality, value and service. Headquartered in Canada with offices in Europe and Asia, Aimtec is actively involved in the research and development of modular switching power supplies. Aimtec's designs assist customers worldwide in reducing engineering design time and expense, while facilitating miniaturization and performance enhancement of their applications.

The industry's largest and most complete product offering of 1 to 3 watt converters just got larger

6 new series

DC/DC Converters (isolated)

Over 3800 models overall (2700+ between 1 ~ 3 watt)

Output power: ¼ W ~ 40W (SMD from 1/4W to 3W)

Input range: 3 ~ 75VDC (±10%, 2:1, 4:1)

Input / Output isolation: 1000 ~ 6000VDC

Industrial operating temperature range: -40°C cold start up to 85°C

Industry standard pin configurations

Wide assorted packages types: SIP, DIP, SMD, 1x1", 2x1", 2x1.6", 2x2"

Did you know

Minimization - Ceramic capacitors withstand higher temperatures, higher voltages conditions and reduced leakage current better than traditional tantalum capacitors: AM2Q-Z, AM3Q-Z and AM6Q-Z boast MLCC

50% smaller - The footprint for DIP24 AM15T(W)-Z is 50% smaller than that of a typical discreet solution's with equivalent specifications.

Saves money and the planet - The AM10TW-4803SZ is so much more efficient than other 10watts in its class that it can save 66.576 kWh over 10 years, which translates to over €20 in savings. Producing 66.576 kWh consumes over 55kg of CO2 and it would take more than 50 maple trees over a year to replace that CO2. Higher efficiency saves you money and the planet!

SWITCHING REGULATORS ARE REPLACING LINEAR REGULATORS

High Efficiency: up to 96% versus 50% for linear regulators

NO heat sink required: Saves PCB real estate

NO forced air cooling required: Eliminates need for mechanical parts

Target Markets:

Fastest growing: green energy initiatives (Energy Star)

All electronics that have been in production for the last 20 years

Market segments: transportation, industrial, commercial, consumer products, etc.

Improved quality / cost ratio with three new cost effective series

AMELx-AZ boasts 305VAC input ideal for building automation systems

5
new series

AC/DC Converters (isolated)

Wide operating temperatures: -40°C to 85°C

High power density: 5 watt, 10 watt and 20 watt with the same small footprint

Low EMI: suitable for very sensitive telecom applications

High I/O Isolation: up to 4000VAC

What makes Aimtec different...

Unique products with distinctive features, such as our newest line of LED Drivers that operate:

- as both AC/DC or DC/DC drivers
- in either constant current or constant voltage mode
- at a bone chilling **-55°C**

A product line that ranges from 1/4Watt to 150Watt and with a selection of over **26 package types**

One of the industry's largest product offerings within the **1 to 3** watt range

Exceptional quality/cost ratio

Most products feature an extended operating temperature range of -40°C to +85°C, with some reaching as far as -55°C to +85°C

Outstanding technical and client **support** worldwide and in several languages – always within 24hrs

Aimtec's strong corporate culture is based on a unique mixture of technical vision, innovation and a strong commitment to **surpassing** our clients' expectations.

Value

Delivering products that provide exceptional performance and reliability at very affordable prices is how Aimtec defines its value proposition. Aimtec's power supplies are designed and manufactured to perform, period. The company **guarantees** the performance and reliability of its AC/DC and DC/DC converters with a two year manufacturer's warranty and a number of its LED drivers with a five year manufacturer's warranty.

Selection

With one of the widest selections of low-to-mid range power converters from 0.25 Watts to 151 Watts, Aimtec offers one of the **industry's largest** product offerings within the 1 watt to 3 watt range.

Lead Time

With standard lead times for product orders of 6 to 8 weeks, complimented by a global network of **stocking distributors** who fulfill sample quantities for most models, Aimtec offers one of the shortest lead times in the industry.

Design

The depth and expertise of Aimtec's electronic design capabilities allow it to deliver highly integrated power supplies that provide energy efficient, cost-effective solutions for a multitude of applications. Aimtec's power converters are renowned for being reliable, robust products that are best in their class for their technical parameters and their **quality/cost ratio** and for exceeding industry norms in terms of features, performance, safety standards and power density.

Support

Aimtec works with a distribution network in over 102 regions **worldwide** to better support and services its clients' individual needs.
